Carolyn S. (Candy) Schwartz, Professor and Coordinator of Doctoral Programs, Graduate School of Library and Information Science

Speaking topics:
- Web development and Web search engines
- Digital libraries, making digital collections
- Celtic music
- J.R.R. Tolkien

B.A., McGill University
M.L.S., McGill University
Ph.D., Syracuse University

Candy Schwartz is a professor in the Graduate School of Library and Information Science. Her teaching activities focus on information organization and retrieval, including subject analysis, website development, and digital libraries.

Please briefly discuss your interest in your field of expertise:

Even though they may sometimes seem “book-bound”, libraries have always been in the forefront of applying new technologies to their services and activities. Libraries have always been great places to work, and the Web has made this even more the case. I am fascinated especially by how people look for information, and how information is organized to make it easy for people to find it.

Did you know...? 

I love languages--I studied French, Old English, German, Spanish, Russian, Latin, and Mandarin Chinese in university, and have taught myself bits of Dutch, Croatian, Thai, Portuguese, and two of the languages of J.R.R. Tolkien.

Any other fun-facts/information you would like to share:

Every January I spend three weeks in Glasgow, Scotland, at a Celtic music festival.
